

Reading

This week we read a book about taking a nature walk and what things you would see in the forest. Then the next day I took the students outside to find their perfect leaf. We then took our leaf and made it into a leaf creature. Look for these as they come home!

At Home

Math

This week we started the next part of chapter two. We reviewed three different ways to find the difference of our subtraction problems. Ask your child to show you at least one way. Just so you know we learned to use a number line, our counting beads and to draw objects and then cross them out. We will learn more next week!

Please practice at least one of the subtraction methods I referred to in the math section!

Don't Forget!

- 10/19 Mrs. Syman Gone
- 10/20 Officer Mazur's Visit!
- 10/23 End of the 1st Quarter
- 10/26 No School
- 10/30 Halloween party and parade

Star Student
Quan Little

Quan was our star student this week. He shared that he loves the color green and eating pizza. He said that he likes to help others and he wants to be a vet when he grows up. Quan had a great time with Marshall when he stayed at his house.
